

ASSOCIATION FOR UNCREWED VEHICLE SYSTEMS INTERNATIONAL

A Message from Michael Robbins, CEO, AUVSI

Michael Robbins

Chief Executive Officer, AUVSI

To the innovators and manufacturers of Japan:

On behalf of AUVSI, I am pleased to welcome companies across Japan as we prepare for XPONENTIAL 2027 in Miami.

XPONENTIAL is the world's largest event for uncrewed systems, robotics, and autonomy. It brings together operators, manufacturers, government officials, defense leaders, and customers to discuss the industry's future and how to achieve it. The event provides opportunities to showcase technologies, build partnerships, and interact directly with customers and decision-makers worldwide.

We are especially pleased to announce the Japan Pavilion, organized with SPACEONE and Messe Düsseldorf. The Pavilion was established for companies interested in international expansion and collaboration. To support first-time participants, exhibitors in the Japan Pavilion will receive complimentary Full Conference Passes to experience all aspects of XPONENTIAL. We encourage you to join the Japan Pavilion and take advantage of this opportunity.

Japan plays a vital role in the future of autonomy. Your engineering and manufacturing excellence are exactly what this market needs, and your leadership continues to shape the direction of the industry.

We look forward to hosting you at XPONENTIAL 2027 and seeing the innovation, expertise, and leadership of Japan's technology community showcased in Miami.

Sincerely,

Michael Robbins
